MAHMOUD NABIL FATHI SADEK

ERPNext Developer

Cairo, Nasr City, Egypt | 01011646496 | Mahmoulionabel@gmail.com

PROFILE

IT professional with a strong background in networking and technical support, combined with hands-on experience as an ERPNext Developer. Over 4 years of experience troubleshooting, maintaining, and supporting enterprise network infrastructures, including Cisco switching, wireless, and Windows Server environments. Alongside this, I work part-time as an ERPNext Developer, customizing and maintaining ERPNext systems using Python and JavaScript, performing version upgrades, and building custom reports and modules on the Frappe Framework, with solid working knowledge of MariaDB. Reliable, detail-oriented, and quick to learn, with strong problem-solving, documentation, and communication skills developed across both infrastructure and software development roles.

EXPERIENCE

Field Maintenance Engineer / IT Technical Support (Full-Time) | *Ecotel Holding -- MOE Project* March 2020 -- Present

Objective: *Ensure reliable, high-uptime network infrastructure through proactive on-site troubleshooting, Cisco infrastructure support, and strong team supervision and documentation practices.*

- Troubleshoot network issues on-site and support Cisco infrastructure (Catalyst 2960XR/2960X/C9300 switches, WLC 3504, and access points).
- Handle UPS troubleshooting (APC, Inform, Legrand -- 6KVA) and document network problems and solutions.
- Recruit, train, and supervise Field Maintenance engineers, along with administrative and reporting tasks.

ERPNext Developer (Part-Time) | *Role8* Feb 2026 -- Present

Objective: *Support Role8's ERP operations by customizing ERPNext to fit business needs, keeping the system up to date through smooth version upgrades, and delivering custom reports and modules that improve reporting and workflow efficiency.*

- Customized ERPNext modules (DocTypes, forms, and workflows) to match business requirements using Python and JavaScript.
- Performed ERPNext/Frappe version upgrades, including testing and validating customizations after each upgrade.
- Designed and developed custom reports (Query Reports and Script Reports) to support business and management decision-making.
- Built custom modules and apps on the Frappe Framework to extend standard ERPNext functionality.
- Wrote server-side scripts in Python and client-side scripts in JavaScript to automate workflows and validations.
- Worked with MariaDB for data queries, report building, and troubleshooting database-related issues.
- Collaborated with the team to test, debug, and document ERPNext customizations.

TECHNICAL SKILLS
